INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/JP2005/002194

	Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability				
1.	The obv	ne questions whether the claimed invention appears to be novel, to involve an inventive step (to be non- povious), or to be industrially applicable have not been examined in respect of:			
		the entire international application,			
	\boxtimes	claims Nos. 17-19			
		because:			
	\boxtimes	the said international application, or the said claims Nos. 17-19 relate to the following subject matter which does not require an international preliminary examination (specify):			
		see separate sheet			
		the description, claims or drawings <i>(indicate particular elements below)</i> or said claims Nos. are so unclear that no meaningful opinion could be formed <i>(specify)</i> :			
		the claims, or said claims Nos. could be formed.	e claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion uld be formed.		
		no international search report h	ernational search report has been established for the said claims Nos.		
		the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:			
		the written form		has not been furnished	
				does not comply with the standard	
		the computer readable form		has not been furnished	
				does not comply with the standard	
		the tables related to the nucleon not comply with the technical re	otide a equir	and/or amino acid sequence listing, if in computer readable form only, do ements provided for in Annex C- <i>bis</i> of the Administrative Instructions.	
		See separate sheet for further	deta	ils	

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/JP2005/002194

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Box No. VI Certain documents cited

 Certain published documents (Rule 70.10) and /or

2. Non-written disclosures (Rule 70.9)

see separate sheet

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claims 17-19 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(l) PCT).

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1) Reference is made to the following documents:

D1: EP-A-1 323 709 (TORAY INDUSTRIES, INC) 2 July 2003 (2003-07-02)

D2: WO 00/00477 A (PFIZER PRODUCTS INC; DUPLANTIER, ALLEN, JACOB;

MILICI, ANTHONY, JOHN;) 6 January 2000 (2000-01-06)

2) Novelty (Art. 33 (1) and (2) PCT):

The compounds presently claimed differ from those of D1 e.g. in the presence of the aryl or heteroaryl ring A between the urea group and the central heterocyclic ring. They differ from those of D2 at least in the saturation level of the central heterocyclic ring. The present application thus complies with Art. 33(2) PCT.

3) Inventive Step (Art. 33 (1) and (3) PCT):

D1 is considered as the closest prior art since it discloses urea derivatives (see e.g. exemple 46) active as adhesive-molecule inhibitor and thus useful for therapies of inflammatory diseases.

The present compounds are structurally different from those of D1 in several part of the molecules, e.g the position of the terminal carboxyl group and the presence of an aryl or heteroaryl ring A between the urea group and the central heterocyclic ring.

The technical problem underlying the present application is the provision of further

International application No.

PCT/JP2005/002194

compounds active as alpha-4 integrin mediated cell adhesion inhibitors useful in the treatment or prevention of inflammatory diseases.

In the light of the present prior art, the compounds of formula (I) can be considered as non-ovious solutions to the problem raised. Pages 14-15 of the description supports the biological activity of the examples so that an inventive step in the sense of Art. 33(2) PCT can be acknowledged for the present application.

4) Industrial Applicability (Art. 33(1) and (4) PCT):

For the assessment of the present claims 17-19 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.
